MANAGED ANTI-SPAM

Reducing the Cost of Defense for your business

Threats facing SMB's Today

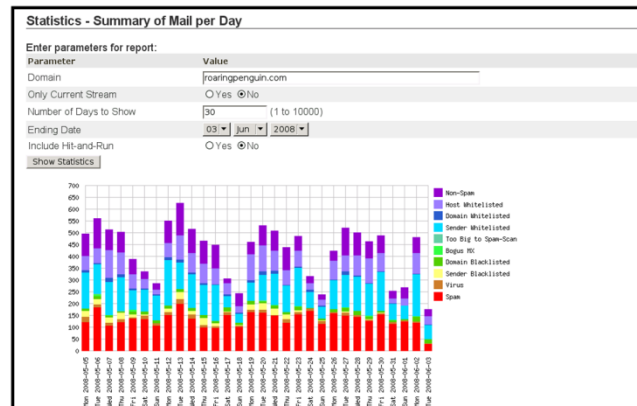

- Email spam
- Malware
- Email worms
- Network viruses
- Spyware
- Data theft

Spam is it just a nuisance?

No, it's the most effective way to transmit a virus!

The volume of spam being sent today is astounding currently in the tens of trillions of emails per year. Junk filters do a good job, but you still have to check for legitimate email and the spam is still getting to your network. All it takes is one careless click and your business could be compromised.

For less than it costs to mail a letter our Managed Anti-spam service prevents all unwanted email, spam and viruses from ever reaching your network. This provides your business the continual protection needed to stay on top of this ever present and evolving threat.

Benefits of a Managed Anti-Spam

- **Fully managed solution for less than any competitive offering**
We understand the overhead and threat spam creates for your business and users. Monitored by us 24/7 and managed by a team of technical experts you won't find a more cost effective per mailbox solution.
- **Reduce operating costs**
A security incident can paralyze your business. Preventing malicious email from reaching your network protects business integrity, increases productivity with less email traffic and provides a fast return on investment. Removing this risk will save you money!
- **Protect your company's critical assets and information**
Targeted attacks and more sophisticated email phishing techniques make it harder to detect real threats. Our solution provides detection and defense against such targeted attacks to your business.
- **A flexible solution**
We can set up your various email filters, or you can have control over what gets through and what is spam. We offer the appropriate security for any size of company and network. And setting it up takes minutes.
- **Comprehensive reporting**
Regular reports identify the volume and types of email being filtered give you the benefit of seeing where email is coming from and how many threats you have avoided. It's satisfying to know that you are safe!
- **Total peace of mind**
You can have as much, or as little control over the filtering of email. Knowing that all your servers, PC's and laptop are protected and there is a group of dedicated experts taking care of it for you 24/7.

Key Features

Enterprise Class Solution

Encompassing more than just anti-spam, this solution also provides anti-virus protection

In stream filtering

There is no delay in email delivery as all email is scanned in real-time. No store and forward here!

Simple Configuration

Flexible configuration options allow you to determine what constitutes spam. Personalized white lists, blacklists and rules can be set up and changed via a web interface

Scans Outbound emails

Outbound emails are checked against known phishing sites to protect your business user from inadvertently propagating a virus or replying to a malicious email

Comprehensive Reporting

A wide range of detailed reports provide you visibility of the volume of email and type of threats so you can see your business is being constantly protected

Fully Monitored System

We monitor the software to ensure it is always working, has the latest spam and phishing profiles and will act immediately if there is an issue.

"80% of all email traffic is Spam. The number one vector for virus delivery to the desktop is email"

Why our clients choose our Managed Anti-Spam Solution

Device Lifecycle Management

Other Anti-spam software:

- Store and forward introduces delays in delivery of emails
- Only filters inbound emails not outbound which could cause your company to be blacklisted
- Only quarantines email on a group basis not on an individual employee basis
- Complex and expensive licensing models

Managed Anti-spam:

- No delay in email delivery, scans in real-time
- Stores received email should your email server go offline
- Applies filters to all outbound email to prevent your users from sending on malicious email
- Priced per mailbox
- Managed by experts
